## KI NRM

Pip Masters, John Butler

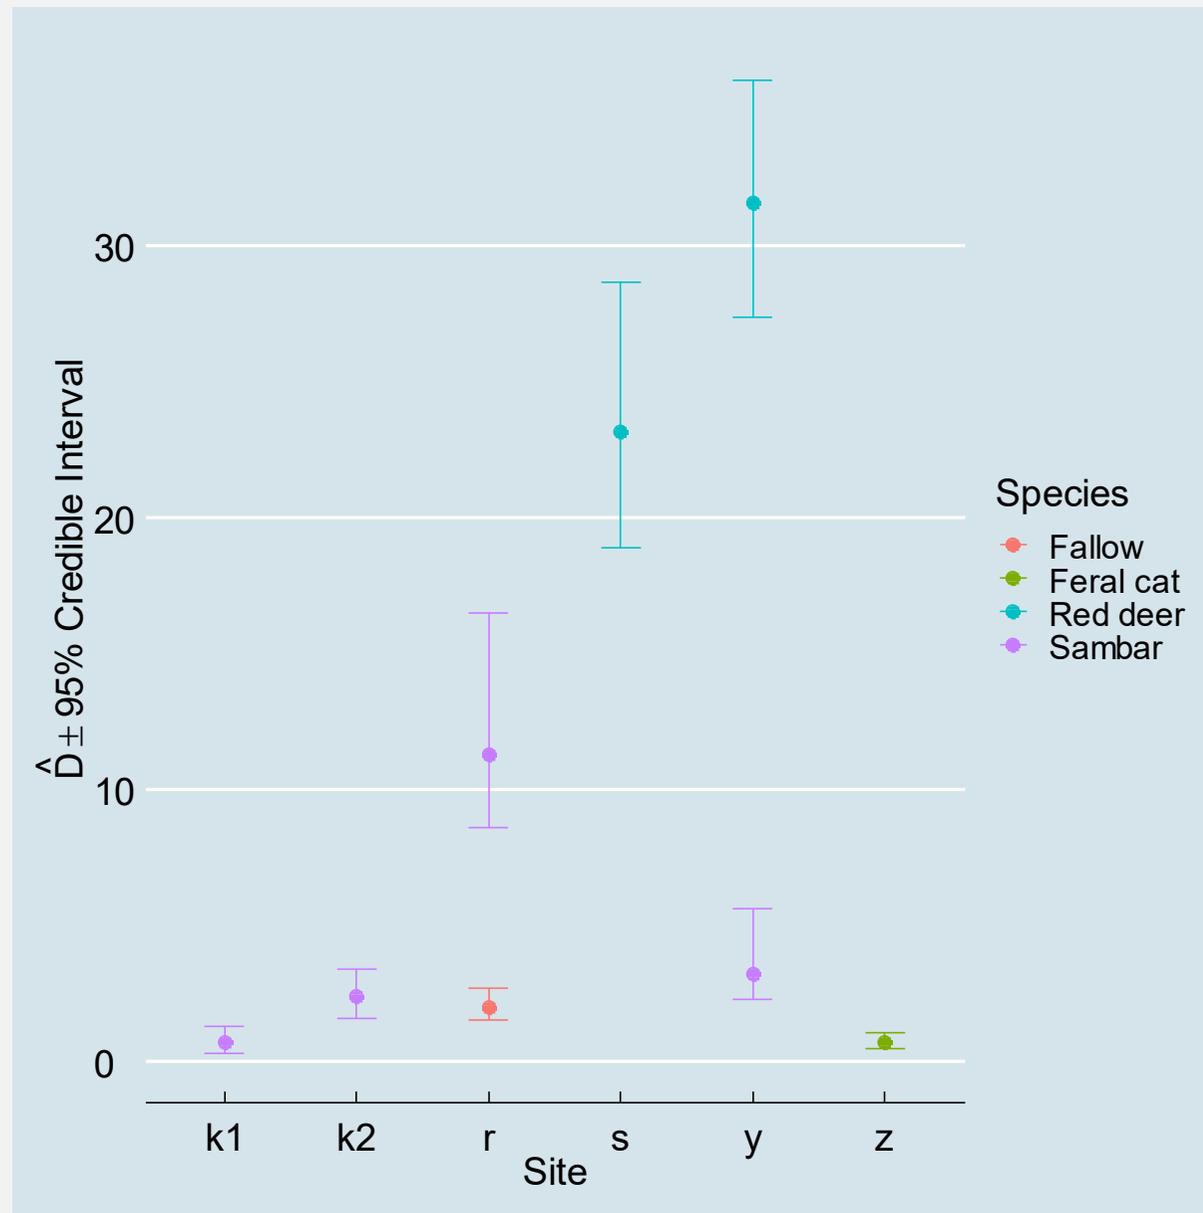

# Camera surveys

- Systematic grid: 300 – 800m
- 3.5 to 14.5 km<sup>2</sup>
- 3 months

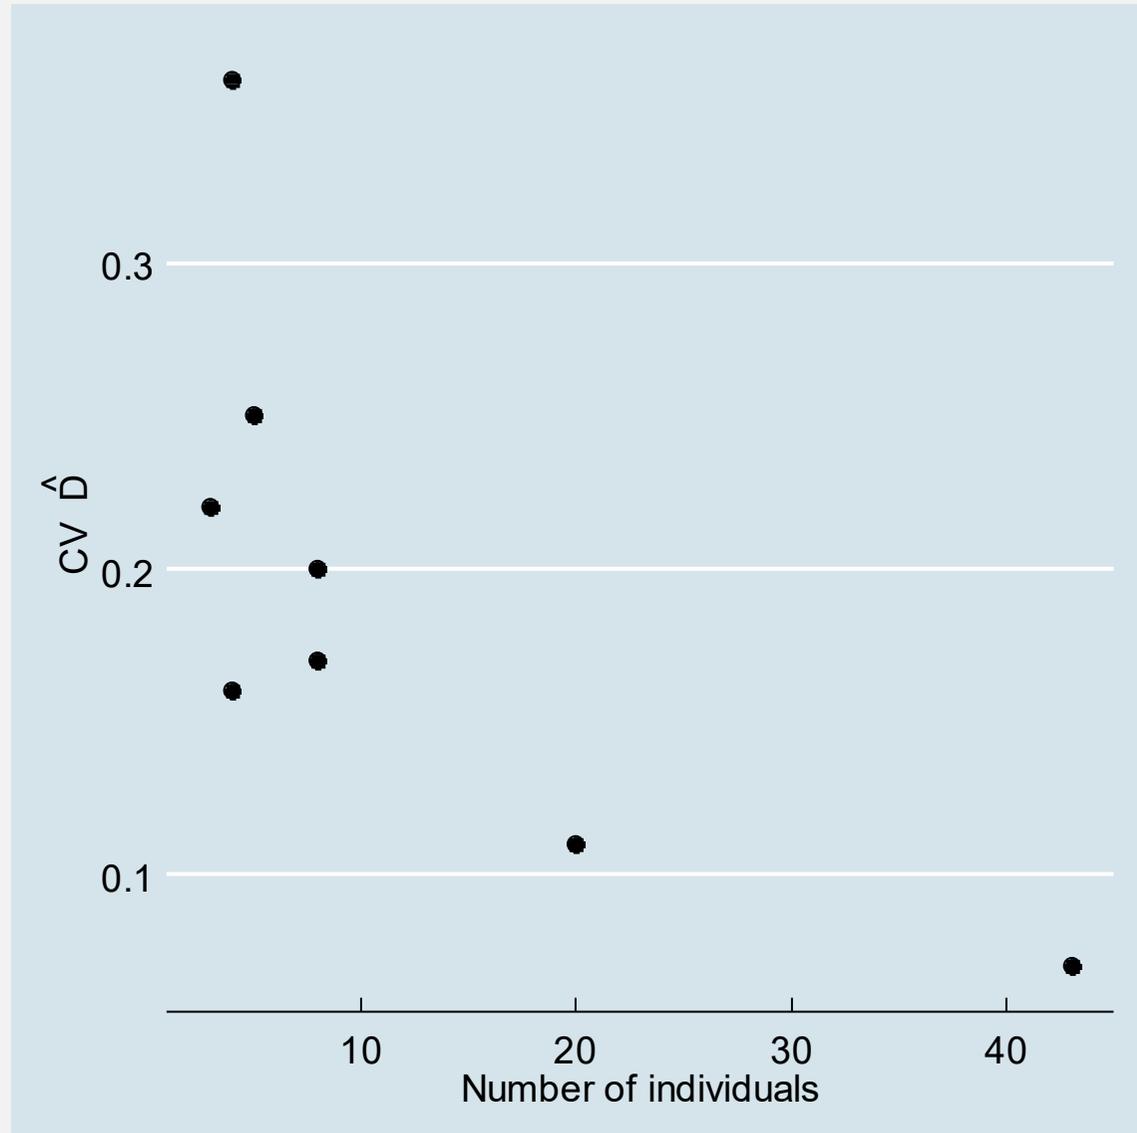

# Results

- Plausible estimates
- Good precision

# Results

- Plausible estimates
- Good precision
- Precision  $\sim$  indivs

# Take homes

- Can be powerful
- Flexible
- Limited scale
- Time intensive
- Good method to have in your pouch
